

TECHNICAL CONDITIONS

Belgrade Future Gaming 2026

- The raised booth floor is obligatory
- The minimum height of the standard stand must be 2.5 metres, and the maximum 3 metres.
- The permitted height of the partition walls of the stand is 3metres.
- If advertising towers, poles, wall panels or other, exceed a height of 4 metres, the consent of the organizer is necessary.
- Each exhibitor is obliged to build his own wall, regardless of the existence of a neighbouring stand wall. If the exhibitor wants to use the wall of the neighbouring stand as his own, he needs the written approval of the stand's exhibitor. The approval should be submitted with the project.
- Nailing, screwing, gluing, welding, drilling or similar is prohibited in any part of the Exhibition Hall.
- When installing lamps or other sources of light, it is necessary to ensure that their distance from flammable surfaces is 40 cm at least.
- If necessary, the floor of the stand can be raised by a maximum of 20 cm. The floor structure must be safe to walk on, with processed edges and installed so as not to damage the floor of the Hall.
- Stand elements cannot exceed the dimensions of the stand.
- The wall of the stand towards the aisle must not be longer than 1/2 the length of that side of the stand.
- In the hall, hanging from the ceiling above the stand is possible, and the technical conditions for approval are within the exclusive competence of the project office of the Belgrade Fair and the inspector of the hall.
